Product Name :

Wimshurst Machine

Product Code :

SLE/EM/26

Description :

- A rapid sequence of sparks can be generated by lowering the system's capacitance.
- The discs are supported in two rigid upright supports, rotating in opposite directions with a hand crank.
- Substantial opposite charges which are deposited in the capacitors and on metal spheres.
- Consists of two high resistance plastic disks of diameter 25mm approximately, with equally spaced metal sectors.
- Provided with a system of induced charge collecting brushes, adjustable ball-ended electrodes and cylindrical Leyden jar capacitors for obtaining higher potential.
- Mounted on insulated wooden base.

Contact Science Lab for your Educational School Science Lab Equipments. We are best high school maths lab kit manufacturers, high school physics lab equipment, high school science kits exporters, high school science lab equipment, high school science lab equipment manufacturers, high, school science lab equipments suppliers.
