Description :

Number Ball (Product Code: SLE/PP/09) is a rubber-based dodecahedron dice marked with numerals 0 to 10, used for number recognition, counting games and quick mental addition and subtraction with children aged 5 to 7. Its many faces let it roll almost like a ball, and one Number Ball is suggested per class section for whole-group games. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a school science kit supplier in India, for pre-primary and early primary classrooms at home and in international markets.

Key Details

Parameter	Detail
Type	Rubber-based dodecahedron dice
Markings	Numerals 0 to 10
Suggested quantity	1 per class section
Age range	5 to 7 years
Concepts	Recognising numerals up to 10; counting and quantity-sense games upto 10; automatising small-number addition and subtraction through games
Product code	SLE/PP/09
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Number Ball Used For?

The Number Ball is built for circle time. A child rolls or gently tosses it, reads the numeral that lands on top, and the group claps, jumps or counts out that many objects. Because every numeral from 0 to 10 can come up, children practise recognising the whole range, including the idea that zero means none.

As confidence grows, the same ball drives mental arithmetic games: roll twice and add, say one more or one less than the roll, or name how many more make 10. Short, repeated rounds are what turn small-number facts into automatic recall. A tally chart of rolls on the board also gives an easy first look at data.

Supplier

The Number Ball is supplied by Jain Scientific Equipments Private Limited, whose trading name is ScienceLab, from Ambala, Haryana. Because one ball serves a whole section, schools usually order by section count, and education programmes and dealers in India and international markets can be quoted for larger roll-outs. Details of the company are on the ScienceLab profile.

Related Pre-Primary Learning Aids

These aids work alongside the Number Ball in number games:
