Product Name :

Dice Set II

Product Code :

SLE/PP/10

Description :

Dice Set II (Product Code: SLE/PP/10) is a set of 3 rubber dice used for number recognition, counting and small-number addition and subtraction games up to 10 in pre-primary and early primary classes. It combines a dodecahedron dice with numerals up to 10, a cube dice mixing domino dots with numerals, and a cube dice with plain numerals 0 to 5. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for small-group maths play in schools across India and abroad.

Key Details

Parameter	Detail
Set contents	3 rubber dice
Dodecahedron dice	Numerals up to 10
Cube dice (first)	Combination of domino dots and numerals
Cube dice (second)	Plain numerals 0 to 5
Number range	Up to 10, including zero
Concepts	Recognising numerals up to 10; cardinality (quantity); number senseto 10; counting; automatising small-number addition and subtraction; understanding zero
Product code	SLE/PP/10
Manufacturer	ScienceLab (Jain Scientific Equipments Pvt Ltd), Ambala, India

What Is Dice Set II Used For?

Having three different dice in one set lets a teacher match the challenge to each child. The domino-and-numeral cube supports children who still check a numeral against its dots, the plain numeral cube asks them to read symbols alone, and the dodecahedron stretches the range up to 10. A small group can play the same game while each child uses the dice that suits their stage.

For early arithmetic, children roll two dice and add, or roll the dodecahedron and take away the number on a cube. When a zero comes up, they see that adding or subtracting it leaves the total unchanged, which makes zero meaningful. Quick, repeated rounds build the automatic recall of small-number facts that later calculation depends on.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies Dice Set II from Ambala, Haryana, to pre-primary sections, primary schools, learning centres and dealers in India and international markets. It is often quoted with Dice Set I and the Number Ball, so a school can cover number work from the first numerals onwards. Visit the ScienceLab profile to learn about the company.
