Product Name :

Fraction Dice (Large)

Product Code :

SLE/LP/06

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Fraction Dice (Large) (Product Code: SLE/LP/06) is a large fraction die used for whole-class activities on identifying, comparing and making common fractions in primary maths lessons. One die is intended per class section, and it drives the fractional number-sense games that are played with the Fraction Kit. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its educational lab equipment for schools.

Key Details

Parameter	Detail
Quantity per class	1 per section
Mode of use	Whole-class activities
Concepts	Identification and comparison of fractions; making and recognising different common fractions
Games	Games for fractional number sense, used with the Fraction Kit
Estimation	Judging how close a fraction is to the known fractions ½, 1/4 and 3/4
Product code	SLE/LP/06
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Fraction Dice (Large) Used For?

Because a single large die serves the whole section, the teacher can roll it at the front of the room and every child works with the same fraction at the same moment — naming it, comparing it with the previous roll, or deciding whether it lies closer to ½, 1/4 or 3/4. That shared focus makes it easy to see who has grasped the idea and who needs another example.

The estimation habit it builds, asking “is this nearer a half or three-quarters?”, gives children a feel for the size of a fraction before they calculate with it. During group time the die links to the Fraction Kit: groups make the rolled fraction with their kit pieces and check whether their estimate was right.

Supplier

Fraction Dice (Large) comes from Jain Scientific Equipments Private Limited, the company that trades as ScienceLab in Ambala, Haryana. It is supplied to primary schools, maths resource rooms and distributors in India and international markets, usually in the same order as the kits it supports. The ScienceLab profile explains more about the company.
