Description :

Stand Bases Steel Varnished (Product Code: SLE/LR/02) is a varnished steel laboratory stand base used as the weighted foot of a retort stand, holding a threaded support rod for clamps, rings and glassware in school and college labs. It is listed in nine sizes weighing from 0.8 kg to 5.0 kg, each with a thread for the rod and one adjustable foot. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Material	Steel, varnished
Rod fitting	Thread
Levelling	1 adjustable foot
Sizes (A length × B width × C height, as listed) and weight	180 × 100 × 6 — 0.8 kg 210 × 130 × 6 — 1.3 kg 250 × 160 × 6 — 2.0 kg 300 × 150 × 6 — 2.2 kg 315 × 200 × 6 — 3.0 kg 210 × 130 × 8 — 1.8 kg 250 × 160 × 8 — 2.6 kg 315 × 200 × 8 — 4.0 kg 315 × 200 × 10 — 5.0 kg
Product code	SLE/LR/02
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are Varnished Steel Stand Bases Used For?

Every retort stand needs a base heavy enough for the load it carries, and the wide spread of weights here lets a lab match the base to the job. A light 0.8 kg base is enough for a single test-tube clamp on a student bench, while the 4.0 kg and 5.0 kg bases give a tall distillation or reflux assembly, or two clamps reaching out sideways, a much lower risk of tipping. Several footprints are offered in more than one C height, so the same bench space can take a lighter or heavier base.

The varnish coats the steel, helping to protect its surface from moisture in everyday use. Wipe chemical spills off promptly, dry the base after cleaning, and keep it out of burner flames. Screw the support rod fully into the thread and turn the adjustable foot until the base sits without rocking. For schools furnishing chemistry lab equipment in India across many benches, these bases are a practical, bench-by-bench choice.
