Description :

Rack Tubes Set of 3 (Product Code: SLE/CL/11) is a set of chemical resistant plastic racks that hold laboratory tubes of various sizes in a stable, upright position, with positions for 240 tubes listed for the set. The racks are used in a wide range of assays to keep small microcentrifuge tubes and screw-capped storage tubes organised during pipetting, labelling and incubation, and they may be used at all facilities from laboratory network levels I to IV. The set is manufacturedby **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, and is a practical addition forlabs sourcing from a lab plastic ware supplier in India.

Specifications

Parameter	Detail
Supplied as	Set of 3 racks
Material	Chemical resistant plastic
Tube positions	Positions to hold 240 tubes (as listed)
Tubes held	Small microcentrifuge tubes and screw-capped storage tubes; various sized lab tubes
Function	Holds tubes in a stable upright position
Suitable for	All facilities, laboratory network levels I–IV
Estimated weight / volume	1.0 kg / 2.43 dm³

Typical Use

Tube racks are the working surface of almost every assay: samples are opened, aliquoted and capped while standing in them, reagents are added in sequence across a row, and finished tubes wait in order for centrifugation, freezing or transport. With three racks in the set, a technician can keep incoming samples, working aliquots and completed tubes on separate racks, which cuts the chance of mixing up specimens in busy microbiology lab equipment set-ups and routine clinical benches alike.

Load tubes in a fixed pattern that matches your worksheet — for example sample 1 at the top-left position — and leave an empty position between groups when running several batches. The chemical resistant plastic can be wiped down with the laboratory's usual cleaning solution after spills; dry the racks before reuse so tubes do not stick. Keep heavy glass vessels off the racks and use them only for the tubes they are designed to hold.

Manufacturer

The rack set is produced by **Jain Scientific Equipments Private Limited**, a company in Ambala, Haryana, that markets its laboratory equipment under the ScienceLab brand to hospitals, colleges and schools. Visit our company profile to see how the business and its product lines are organised.
