Freeze protection	No user intervention required to keep vaccines from exposure to temperatures below 0°C, whatever their position in the vaccine compartment
Vaccine storage capacity	1.5 litres
Construction	With lid and carrying handle
Icepacks	4 x 0.6 litre icepacks supplied as standard
Weight fully loaded	8 kg
Cold life	34 hours at 43°C without openings
Packing	Double-wall carton, 1 unit per carton
Estimated shipping weight (per unit)	4.2 kg
Estimated shipping volume (per unit)	0.035 m^3
Coolant	Conditioned water packs
Includes	Packing diagram
Product code	SLE/CCE/014
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Vaccine Carrier Used For?

Health workers use this carrier to take vaccines from the clinic refrigerator to a village session, school or house-to-house round and bring unopened vials back. Its long-range design and 34-hour cold life at 43°C without openings make it suited to long days in hot weather, while the Grade A freeze-free design means staff do not have to arrange the vials in any special way to keep them above 0°C.
