Description :

Acupuncture Model 84 cm, Deluxe (Product Code: SLE/BL/01) is a colourful, highly illustrated plastic figure for teaching the channel and point system used in Chinese medicine. Its right side maps 14 primary channels, 361 acupoints and 48 extraordinary acupoints with CUN markers for judging the distance between points, while the left side opens into a subcutaneous view ofnerves, blood vessels and muscles. Colleges of acupuncture, massage and traditional medicine, physiotherapy trainers and wellness academies use it as a shared reference in class. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, an anatomical models manufacturer supplying teaching institutions.

Specifications

Parameter	Detail
Height	84 cm
Material	Colourful plastic, highly illustrated and detailed
Right side	14 primary channels, 361 acupoints, 48 extraordinary acupoints, CUN markers
Left side	Subcutaneous view of neural distribution, artery, vein, blood vessel and muscular structures
Additional points (left side)	Upper and lower extremity Extra points not located on the primary channels
Suitable for	Teaching and learning of Chinese medicine, acupuncture and massage

Typical Use

Instructors use the right side to walk students through each channel in turn, pointing out named acupoints and using the CUN markers to show how point locations are measured in proportional body units rather than centimetres. Once a pathway is learned on the surface, turning the model to the left side lets the class see what lies beneath — nerves, arteries, veins and muscles — which helps practitioners understand why some points need careful needle depth and angle.

The figure also works as a revision tool: students can quiz one another on point locations or trace the Extra points of the upper and lower limbs that sit off the primary channels. As one of the more specialised biology teaching aids India institutions stock, it lasts longest when kept upright away from direct sunlight and dusted with a soft, dry cloth rather than solvents that could fade the printed markings.

Manufacturer

Jain Scientific Equipments Private Limited produces anatomical and teaching models in Ambala, Haryana, and markets them under the ScienceLab brand. You can learn more about the company on our company profile.
