Weight, fully loaded	7.3 kg
Construction	Insulated carrier
Coolant	Conditioned water packs
Includes	Packing diagram
Product code	SLE/CCE/021
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Extra Large Vaccine Carrier Used For?

This carrier is sized for heavy outreach days, such as school campaigns, catch-up drives or clinics giving several vaccines in one session, when a smaller carrier would run out of room. Vials go into the 3-litre storage space once the icepacks are in position, and the team carries the box from the vehicle to the session point by its handle.

Freeze or condition all seven icepacks according to your programme's packing guidance before loading. The 30.3-hour cold life applies at 43°C with the lid kept shut, so a day of frequent openings will use it up faster. For campaigns that equip many teams at once, we can quote the carrier as part of a scientific equipment bulk supply order together with spare icepack sets.

What to Specify When Ordering

- The model: Vaccine Carrier Extra Large (SLE/CCE/021).
- The number of carriers for your outreach teams.
- Any additional icepack sets (each set is 6 x 0.3 litre plus 1 x 0.6 litre).
- The delivery location, in India or overseas.
