Description :

Web-Enabled Data Logger (Product Code: SLE/CCE/026) is an electronic temperature data logger used to record storage temperatures in vaccine refrigerators, freezers and cold rooms and transfer that record to a computer by USB. It covers -30 to +70°C with ±0.5°C accuracy and a minimum logging interval of 1 minute. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, alongside other digital measuring instruments for health and laboratory users.

Specifications

Parameter	Detail
Operating temperature	-30°C to +70°C
Alarm	Visual
Battery type	Non-replaceable CR lithium
Battery shelf life	12 months
Activated life	12 months
IP rating	IP 65
Display medium	LCD
User interface	USB for computer
Minimum logging interval	1 minute
Accuracy	±0.5°C
Identification	Unique serial ID
Recording	Time-stamped
Connectivity	Network/SIM/cloud
Features	Data export and offline buffering
Product code	SLE/CCE/026
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Web-Enabled Data Logger Used For?

The Web-Enabled Data Logger stays inside the appliance or cold room and records temperatures at intervals down to 1 minute. During a supervision visit or at the end of a reporting period, staff connect it to a computer through USB to review and save the record. Its -30 to +70°C range lets the same model serve freezers as well as refrigerators.

The visual alarm on the LCD draws attention to problems between downloads. The CR lithium battery cannot be replaced and both its shelf life and activated life are 12 months, so budget for new u
