Description :

Advanced Child CPR Training Manikin (Product Code: SLE/BL/03) is a child-sized simulation model for practising paediatric resuscitation — chest compressions (heart pressure) and mouth-to-mouth respiration — with light indicators that show at once whether each step is donecorrectly. Designed according to the International CPR standard, it lets paediatric nurses, schoolhealth staff, paramedics and first aid instructors rehearse the adjustments needed when thepatient is a child rather than an adult. It suits institutions assembling a health education kit schoolIndia programmes use for life-saving skills. It is made by the anatomical models manufacturer **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Key Details

Parameter	Detail
Type	Child CPR simulation model
Design basis	Designed according to the International CPR standard
Skills practised	Patient revival through heart pressure and mouth-to-mouth respiration
Respiration indicator	Light indicator display for correct and incorrect artificial respiration (mouth-to-mouth)
Compression indicators	Correct compression position display and wrong compression position display
Suitable for	Paediatric CPR and first aid training

Typical Use

Child CPR differs from adult technique in hand use, force and breath size, and trainees who have only practised on an adult model tend to over-press or over-inflate. On this manikin the instructor can let each trainee try, watch the compression-position lights, then correct placement straight away; the respiration lights do the same for rescue breaths, showing whether the airway was opened and the breath delivered properly. Short, repeated rounds work better than a single long attempt, so plan the class in rotations.

Schools, colleges and hospitals that source from a school lab equipment supplier India wide often pair this model with the adult and infant versions so that one course covers every age group. Between trainees, wipe the face and mouth area according to your hygiene procedure, and keep the manikin in a dry cupboard away from heat so the indicator components stay in good order.

Manufacturer

ScienceLab is the brand of Jain Scientific Equipments Private Limited, a company based in Ambala, Haryana that makes training models for medical and science education. It is registered as an MSME manufacturer under Udyam UDYAM-HR-01-0003714, and its international consignments move under IEC AAECJ8618A from the Directorate General of Foreign Trade. See our c
