Description :

Vacuum Tube, Plain/Dry (Product Code: SLE/CL/38) is a 6ml evacuated PET blood collection tube without anticoagulant, used to collect venous blood that is left to clot so serum can be separated for testing. Its vacuum-sealed cap draws blood once connected to a venipuncture needle, which makes it a routine item at phlebotomy counters, hospital laboratories and medical laboratory training rooms. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its disposable lab equipment range in India.

Specifications

Parameter	Detail
Type	Vacuum blood collection tube, plain (dry)
Material	Plastic (PET)
Capacity	6ml
Anticoagulant	None (tube without anticoagulant)
Closure	Capped with vacuum seal
Application	Blood collection
Storage	Between 2 °C and 30 °C
Product code	SLE/CL/38
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Plain Vacuum Tube Used For?

A plain tube is chosen when the laboratory needs clotted blood, most often so that serum can be separated for biochemistry or serology work. After the draw, the tube is stood upright and left undisturbed until a firm clot forms; it is then centrifuged and the clear serum above the clot is transferred with a pipette for testing. Because nothing has been added to the tube, there is no additive to mix in, and in a multi-tube draw plain tubes are normally filled before additive tubes such as EDTA so that no anticoagulant is carried over.

Keep unopened stock between 2 °C and 30 °C, label each tube immediately after filling, and set aside any tube that does not draw blood, as its vacuum may have been lost. Training institutes that order from a lab consumables supplier in India often stock plain, serum gel and EDTA tubes together so students can practise the complete venous sampling sequence.

Manufacturer

This plain vacuum tube is manufactured by Jain Scientific Equipments Private Limited, the Ambala, Haryana company that trades under the ScienceLab name and provides blood-collection consumables to clinical and teaching laboratories in India and international markets. Background on the company is given on the ScienceLab company profile.
