Description :

This 95 litre aluminium box gives a school store room, education programme or field office one lockable place to keep a kit, books or equipment, and a container to carry them in. It measures 770 x 430 x 340 mm outside and 750 x 410 x 310 mm inside. A gasket seals the lid, two latches take padlocks and cast corners let boxes stack.

Aluminium storage box dimensions and fittings

Parameter	Detail
Capacity	95 L
External dimensions	770 x 430 x 340 mm
Internal dimensions	750 x 410 x 310 mm
External envelope	About 0.113 m³
Material	Aluminium sheet

Lid and locking	Sealing gasket; 2 lockable latches (padlocks not included, available separately)
Hinges and handles	Stainless steel hinges; 2 handles
Corners	Cast aluminium stacking corners
Product code	SLE/CS/04
Minimum order	10 units
Dispatch	Usually within 7 to 10 working days
Manufacturer	ScienceLab (Jain Scientific Equipments Pvt Ltd), Ambala, India

Keeping and moving kits in the 95 L aluminium box

Term-time storage. Schools and education programmes use a box like this to keep the parts of a kit such as the School-in-a-box or the ECD kit together between lessons. Tape a contents list inside the lid, check the items back in after each session, then close the lid onto its gasket and padlock both latches.

Moving a kit to a learning centre. Pack the box at the central store, lock it and lift it by its two handles onto the vehicle. At the centre the same box becomes the kit's cupboard, so a recreation kit or a set of Grade 5-8 student kits stays together until distribution day. Field offices use it the same way for a wind-up multiband radio.

Store-room care. Stand loaded boxes on their cast corners with the heaviest at the bottom, and keep the stack off a damp floor. Do not overfill: the lid must close flat on the g p cloth
