Product Name :

EDTA Capillary Tube

Product Code :

SLE/CL/43

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

EDTA Capillary Tube (Product Code: SLE/CL/43) is a 75 mm capillary tube with an internal EDTA coating, designed for the collection, transportation and processing of capillary blood from a finger or heel prick. The EDTA stops the small sample from clotting, so it can be carried to the bench and centrifuged or dispensed for testing. Tubes are packed in vials of 100 and are used by haematology benches, point-of-care testing sites and training laboratories. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab consumables supplier in India for clinical sampling items.

Specifications

Parameter	Detail
Type	Capillary tube, EDTA coated
EDTA coating	1.65 mg/ml (listed as 1,65 mg/ml)
Diameter	1.15 mm (listed as 1,15 mm)
Length	75 mm
Packing	Vials of 100 tubes
Application	Collection, transportation and processing of capillary blood

Typical Use

After the skin is punctured with a lancet and the first drop wiped away, the tip of the tube is touched to the next drop and blood rises by capillary action. Hold the tube level or angled slightly downward and stop before the end to avoid air gaps. For packed cell volume work, one end is closed with sealant, the tube is placed in a haematocrit centrifuge, and the ratio of packed cells to total column is read afterwards; tubes can also be used to move a measured drop onto slides or test devices.

Roll the filled tube gently between the fingers to spread the EDTA through the blood, and process the sample promptly. Nursing and medical laboratory technology programmes buying lab equipment for college teaching in India often use EDTA capillary tubes to show students how small-volume sampling differs from venous collection. Keep vials closed when not in use so the tubes stay clean.

Supplier

These capillary tubes are supplied by Jain Scientific Equipments Private Limited, a company in Ambala, Haryana, that trades as ScienceLab and keeps a range of capillary sampling consumables for laboratories and health programmes. For vendor registration, its GSTIN is 06AAECJ8618A1ZT and its Legal Entity Identifier (LEI) is 3358004HRD1JIVXKYX49. The company profile has further information.
