Description :

Storage Box, 100 Slides (Product Code: SLE/CL/51) is a storage box for up to 100 standard microscope slides of 7.6 x 2.6 cm, made of resistant thermoplastic ABS with a cork base. A lid with a sturdy lock keeps the contents secure, and the flap cover carries an index card holder so users can note what each box contains. Pathology labs, blood-film archives, malaria microscopy units and biology departments use boxes like this to keep stained or prepared slides clean, organised and ready for review. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)** , Ambala, a biology lab equipment manufacturer in India.

Specifications

Parameter	Detail
Type	Storage box for microscope slides
Capacity	100 microscope slides
Slide size	Standard 7.6 x 2.6 cm
Box material	Resistant thermoplastic ABS
Base	Cork
Closure	Lid with sturdy lock
Labelling	Index card holder on the flap cover

Typical Use

Clinical laboratories often need to keep slides after reporting, for example blood films for review by a senior reader or malaria smears retained for quality-control rechecking. Storing them in a closed box protects the stained surface from dust, light and scratches, while the index card lets staff list slide numbers, dates or patient codes on the outside so a particular slide can be found without opening every box. The lock keeps the lid shut when boxes are carried between rooms or sent to a reference laboratory.

Make sure slides are completely dry and, where applicable, coverslipped before they go in, and keep the box in a cool, dry cupboard. College departments that build up permanent slides for biology teaching in India use the same boxes to keep class sets together from one year to the next. The ABS body can be wiped clean with a mild detergent; avoid strong solvents such as acetone, which can mark this plastic.

Manufacturer

Jain Scientific Equipments Private Limited, incorporated under CIN U29309HR2020PTC087597 and trading as ScienceLab, manufactures laboratory storage and handling items in Ambala, Haryana. Its production site is the licensed factory at 449, HSIIDC Industrial Area, Saha, Ambala, which holds Factory Licence AMB-ONLINE-CHD-J-414. Read more on the ScienceLab company profile.
