Description :

Duster/Wiper for Blackboard (Product Code: SLE/CS/019) is a hand-held chalk eraser measuring 14.5 x 6.5 x 3.5cm, with six strips of dense eraser felt mounted on a strong wooden backing. Teachers use it every period to clear notes, diagrams and sums from the board, and its shaped wooden handle makes it easy to pick up and comfortable over a full school day. It ismade by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as one of the everyday classroom items produced alongside its educational science equipments.

Specifications

Parameter	Detail
Type	Blackboard duster / chalk eraser
Dimensions	14.5 x 6.5 x 3.5cm
Cleaning face	Six strips of dense eraser felt
Backing and handle	Strong wooden backing; wooden handle body, ergonomically designed for easy pick up and comfortable use
Wood	Resistant to breakage; made from non-virgin wood
Suitable surfaces	Chalkboards and whiteboards; safe for daily use on all chalkboard surfaces
Estimated weight	0.068kg
Estimated volume	0.410cdm

Typical Use

Wipe the board from top to bottom in overlapping vertical strokes so loosened chalk falls towards the ledge instead of spreading across clean areas. The felt strips hold chalk dust as they work, so tap the duster gently against a bin or outside the window at the end of the lesson rather than clapping it inside the room. It works on whiteboards too, which is useful in schools that have both board types in the same building.

Keep one duster at every board and a spare in the staff room, and include replacements in routine classroom and lab equipment maintenance in India's schools at the start of each term. Because the handle and backing are made from non-virgin wood, the duster also suits schools that prefer materials made with recovered timber.

Manufacturer

The duster is manufactured under the ScienceLab brand by Jain Scientific Equipments Private Limited, a company headquartered in Ambala, Haryana, that makes board accessories, teaching aids and laboratory apparatus for India and international markets.
