Description :

Tape, Measure, 5 m, Retractable (Product Code: SLE/PE/04) is a pocket-size wind-up measuring tape used to measure and mark out sports grounds and activity areas in school physical education. Its 13 mm wide, plastic-coated metal blade is graduated in 1 mm and 1 cm steps in black, with every 10 cm marked in red, and a locking mechanism and metal clip let a referee carry it on their clothing. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Length	5 m
Blade width	13 mm
Blade material	Thin, plastic-coated metal
Graduations	On one side: 1 mm and 1 cm marks in black, 10 cm marks in red
Case	Plastic, assorted colours, 7 x 7 cm; tape stored wound up
Controls	Locking mechanism; automatic retraction
Attachment	Metal clip for fixing to a referee's clothing
Estimated weight	131 g
Estimated volume	0.13 dm^3
Estimated dimensions	7 x 7 x 2.5 cm
Product code	SLE/PE/04
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the 5 m Retractable Tape Measure Used For?

PE teachers and referees use this tape to set out pitch markings, check distances for standing jumps and short throws, and space cones, corner flags and start lines evenly. For distances longer than 5 m, measure in stages and mark the end of each stage with chalk before moving the tape on.

To measure, pull the tape out to the required length and push the locking mechanism down to hold it in place. To wind it up, push the lock up and the tape retracts automatically; guide the end with your hand so it does not snap back against the case. The red 10 cm marks make quick readings easier when you are working outdoors.

Manufacturer

This tape measure is manufactured by ScienceLab, the trading name of Jain Scientific Equipments Private Limited, a school laboratory equipment supplier in India that also serves physi ers in Ind detail
