What Are the Board Games Used For?

This box gives a school a ready indoor alternative for days when rain, heat or a busy playground keeps pupils inside. Chess and checkers develop planning, patience and the habit of thinking a few moves ahead, while slides and ladders suits younger children who are practising counting, turn-taking and following simple rules.

Because the boards are double-sided, a teacher can set up different games side by side at the same table, run a small chess or checkers club, or rotate groups between games during a recreation period. The laminated surface can be wiped clean after play; count the pieces back into the box at the end of each session so the set stays complete.
