Product Name :

Beach Ball, Inflatable

Product Code :

SLE/EDS/040

Description :

Beach Ball, Inflatable (Product Code: SLE/EDS/040) is a light blow-up play ball used for throwing, catching, volleying and group games with young children in PE lessons and outdoor play. It inflates without a pump to approx. 42 cm across (approx. 132 cm circumference) and arrives with a transparent vinyl repair kit for punctures. Supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, it is an easy addition to a preschool kit in India or a primary PE cupboard.

Product code	SLE/EDS/040
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Beach Ball Used For?

A large, light ball moves slowly through the air, which gives small children time to track it and get their hands ready. Teachers use it for first catching and throwing practice in pairs, for keep-it-up volleying in a circle, for rolling and kicking games on grass, and for bouncing across a play parachute. Older pupils can use it for lead-up volleyball drills where a slower ball helps them learn to set and pass.

Inflate it until it is firm but not tight, and keep it away from thorns, sharp gravel and hot surfaces. If a small puncture appears, the included vinyl patch lets staff repair it on the spot instead of discarding the ball; let out some air before storing it for a long period.

Supplier

This beach ball is supplied by Jain Scientific Equipments Private Limited, which does business as ScienceLab from Ambala, Haryana. Pre-schools, primary schools and activity programmes can order it on its own or with the soft balls, parachute and games in our PE range. The company profile gives more background on who we are.
