Description :

Volleyball Net (Product Code: SLE/EDS/041) is a 9.5 x 1 m nylon net used to set up a volleyball court for school physical education lessons, inter-house matches and recreation. It combines a minimum 100 mm nylon mesh with a nylon headband carrying a 3 mm steel cable, and its sides and bottom are finished with heavy overlock stitching; posts are not included. The net is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Net size	9.5 x 1 m (listed as official size)
Mesh	Nylon, minimum 100 mm
Thread size	Minimum 2 mm
Headband	Nylon
Edge finish	Sides and bottom finished with heavy overlock stitch
Headband cable	3 mm steel cable
Posts / standards	Not included
Estimated weight	1.562 kg
Estimated volume	5.6 dm³ (litres)
Intended use	Physical education and recreation
Product code	SLE/EDS/041
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Volleyball Net Used For?

The net is stretched between two posts across the centre line of a court, with the steel cable in the headband taking the tension so the upper edge stays straight. PE teachers use it to teach serving, digging, setting and blocking, to run class matches and house tournaments, and to play simpler lead-up games in which younger pupils throw and catch a light ball over the net.

Adjust the net height to suit the age group you are teaching, and tighten the cable evenly at both posts before play. After the lesson, lower the net rather than leaving it strung up in rain or strong sun, and fold it without dragging it on rough ground so the mesh and stitched edges stay intact.

What to Specify When Ordering

- The number of nets – one per court, plus any spare you want to keep in stock.
- Whether your courts already have posts, since this net is supplied without standards or posts.
- Any balls, pump or match equipment to be quoted with the net.
