Description :

Blue Pen Ball Point (Product Code: SLE/S/11) is a blue-ink ballpoint pen used for daily classwork, homework and note-taking by students and teachers. Its 1 mm ball and blue tropical ink hold approximately 0.30-0.37 g of ink, enough for a minimum writing distance of 2,000 metres. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a science kit exporter from India that also includes everyday stationery in its school orders.

Specifications

Parameter	Detail
Ink colour	Blue
Ball size	1 mm
Ink type	Tropical ink
Ink quantity	Approximately 0.30-0.37 g
Writing distance	Minimum 2,000 metres
Intended use	General purpose writing
Product code	SLE/S/11
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Blue Ball Point Pen Used For?

In many schools blue is the standard ink for pupils' own work: exercise books, homework, essays and write-ups of practical experiments. Blue handwriting stands out from black printed text on worksheets and from a teacher's red marking, so it is easy to see at a glance which parts of a page the student wrote.

Let the 1 mm ball roll across the page rather than pressing hard, which can dent or tear thin paper; if the ink hesitates after a long break, a few small circles on scrap paper usually restore the flow. Schools that source from school science lab equipment suppliers in India can add blue pens to the same consignment as their kits and apparatus, which simplifies start-of-term purchasing.

Supplier

Jain Scientific Equipments Private Limited, known to customers as ScienceLab, supplies the Blue Pen Ball Point from Ambala, Haryana, sourcing it for schools, colleges and stationery distributors that want pens and teaching equipment on one quotation. Buyers completing vendor registration forms can use CIN U29309HR2020PTC087597 and GSTIN 06AAECJ8618A1ZT. Further company details are on the about ScienceLab page.
