Description :

Safety Scissors School Blunt (Product Code: SLE/S/12) are 135 mm school scissors with blunt, round-tipped stainless steel blades, used by younger children to cut paper and light card in craft and classroom activities. The sturdy plastic handle has grip loops made for both left- and right-handed pupils, and each pair is fitted with a hard plastic edge protector over the blades. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, one of the educational laboratory suppliers serving schools in India and abroad.

Specifications

Parameter	Detail
Type	School safety scissors, blunt/blunt
Blades	Stainless steel, blunt, with rounded tips
Pivot	Rivet of stainless steel or rust-proof metal securing the two blades
Total length	135 mm
Handle	Sturdy plastic, with minimum horizontal movement of handle and blades
Grip loops	Made for left- and right-handed users
Blade guard	Hard plastic edge protector that fits securely over the cutting blades
Intended users	Younger children
Cuts	Paper or light card
Product code	SLE/S/12
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Blunt Safety Scissors Used For?

Cutting along a line is an early fine-motor skill, and blunt-tipped scissors let young pupils practise it in art, craft and early science activities: cutting out shapes, making paper models, preparing picture cards for sorting games or trimming card for a simple experiment. Nursery and KG classrooms often order them together with a pre-primary science kit, since many hands-on activities begin with cutting and sticking.

Teach children to carry the scissors closed with the edge protector fitted, to pass them handle first, and to cut only paper or light card; thick card, plastic or fabric strains the rivet and dulls the blades. Returning each pair to a class tray with its guard on keeps sets complete, and the firm plastic handle with little sideways play helps small hands make cleaner cuts.

What to Specify When Ordering

- Quantity: one pair per pupil or a shared set per class group
- Handedness: the grip loops suit left- and right-handed users, so one type serves the whole
- ut

Sup
