Description :

Handball, Senior (Product Code: SLE/PE/010) is a senior-size synthetic-leather ball used for handball matches, team training and shooting practice by older pupils in school and college physical education. It measures 58–60 cm in circumference and weighs 425–475 g, giving the heavier feel older players need for longer passes and harder shots. Delivered deflated with two non-return inflating needles, it is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Size	Senior
Circumference	58–60 cm
Ball weight	425–475 g
Outer casing	Synthetic leather
Valve	Non-return valve
Playing surface	Suitable for all types of playgrounds
Delivery condition	Deflated; supplied with two non-return inflatingneedles
Intended use	Physical education and recreation
Estimated weight (catalogue figure)	0.520 kg
Estimated volume (catalogue figure)	3.198 dm³
Product code	SLE/PE/010
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Senior Handball Used For?

Once pupils have mastered basic grip and passing with a smaller ball, the senior size is used for full team play: fast breaks, jump shots, passing under pressure and goalkeeper practice. School teams use it for training sessions and inter-school fixtures, and PE staff use it to teach tactics such as spacing, marking and quick transitions from defence to attack.

Keep each ball inflated to the pressure recommended on the ball so that bounce and grip stay consistent from session to session. Wipe off dust and moisture after outdoor play, store the balls away from long direct sunlight, and check the valve area occasionally for slow leaks.

What to Specify When Ordering

- Confirm the senior size is right for your players; a junior handball is listed separately for younger pupils.
