Description :

Footstool Two Steps (Product Code: SLE/HF/08) is a sturdy two-level step stool that helps patients climb onto examination couches, delivery tables and hospital beds, and gives staff a secure platform when they need extra height at the bedside or operating table. The steps carryan embossed anti-slip pattern, and the legs end in heavy duty anti-slip rubber ends. Clinics,wards, theatres and maternity units buying from a government lab equipment supplier often orderone per couch. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**,Ambala.

Specifications

Parameter	Detail
Type	Footstool, 2 step levels
Steps	Heavy duty solid plastic with embossed anti-slip pattern
Legs	Robust supporting legs, spaciously arranged for maximal stability; transfer bars connect the lower distal portions for structural strength
Feet	Heavy duty anti-slip ends, rubber or plastic
Frame	Epoxy coated or chrome plated tubular steel, 2.5–3.0 cm (outside, across), 1.2–1.5 mm thickness
Corrosion resistance	High (tropical environment)
Overall size	60–64 × 34–38 × 41–43 cm (l × w × h)
Carrying capacity	100 kg

Typical Use

Place the footstool square against the side of the couch or table with both steps facing the patient, and offer a hand as they step up one level at a time. The wide leg stance and rubber-tipped feet resist tipping and sliding on smooth hospital flooring, while the textured step surfaces give grip to bare feet or shoe covers. In theatre, a nurse or assistant can stand on the upper step to see into the operative field or reach overhead equipment.

Keep the stool clear of wet floors and remove it once the patient is settled so it is not a trip hazard. Nursing schools working with a vocational training lab equipment manufacturer in India include footstools in their practice wards so students learn safe patient-assist techniques. The solid plastic steps and coated frame can be wiped with standard hospital disinfectant.

Manufacturer

Made in Ambala, Haryana, by Jain Scientific Equipments Private Limited, which sells its laboratory and hospital products under the ScienceLab name. We handle orders of any size, from a single clinic to a complete hospital fit-out, and our company profile explains more about how we work.
