Description :

Curette Uterine Sharp & Blunt (Product Code: SLE/BL/15) is a stainless steel gynaecological curette in sharp and blunt patterns, used to scrape or sample the uterine lining withingynaecology instrument sets and for instrument-identification practice in medical and nursingtraining. It suits instrument rooms, nursing schools and paramedical institutes that want adimensionally accurate, strongly constructed curette. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a laboratory equipment supplier toinstitutions.

Key Details

Parameter	Detail
Type	Uterine curette, sharp and blunt pattern
Material	Stainless steel
Construction	Dimensionally accurate and strongly constructed
Sterility	Not stated — treat as non-sterile unless confirmed in writing
Product code	SLE/BL/15
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Uterine Curette Used For?

A uterine curette is drawn along the uterine wall to scrape or sample tissue. The sharp pattern has a cutting edge and the blunt pattern a rounded one, which is why gynaecology instrument sets commonly carry both. In medical, nursing and paramedical teaching, the same instrument is used for identification tests, tray-preparation exercises and handling practice, where students learn to tell the two edge profiles apart and pass the instrument safely.

Stainless steel stays in good condition when it is cleaned promptly after each session, rinsed, dried thoroughly and stored in a dry tray; long soaks in strong chloride or bleach solutions should be avoided because they can mark the surface. Inspect the working edge before every use and set aside any instrument that is bent or nicked.

Supplier

Jain Scientific Equipments Private Limited trades as ScienceLab from Ambala, Haryana, India, and supplies this uterine curette as part of its surgical instruments range for teaching institutions, instrument rooms and distributors. Any clinical-use, sterility or packaging requirement should be raised at enquiry stage so it can be checked before a quotation is issued. Company background is on our company profile.
