Care before reuse	Disinfect in a chlorine solution, then wash and iron
Worn over	Everyday clothing, or a surgical tunic and trousers
Product code	SLE/MR/06
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Medium Medical Coat Used For?

Laboratory technicians, pharmacists, nurses and trainee doctors of average build wear the medium medical coat as a clean outer layer in wards, dispensaries, clinical laboratories and teaching hospitals. The white fabric makes any soiling obvious, so staff know when a coat must be changed, and the coat adds a layer over a surgical tunic and trousers when staff move between departments.

Snap closures open quickly if a coat is splashed and has to come off, while buttons are familiar and simple to replace, so decide which suits your staff before ordering. Reserve the medium size for wearers whose sleeves end at the wrist, and send used coats for chlorine disinfection, washing and ironing, as the listing specifies.
