Description :

Circulatory System Model Activity Set (Product Code: SLE/BL/17) is a hands-on classroom set built around a full-colour, markable model of the circulatory system made from durable vinyl. Students trace blood vessels throughout the body, study a cutaway view of the heart's interiorand look at an enlarged cutaway section of a vein and an artery, while an activity guide and athree-overlay heart transparency reinforce how circulation works. Middle and secondary schoolbiology teachers and teacher-training colleges use it as a ready-made human body model kitIndia classrooms can run as a guided activity. It is made as school biology lab equipment in Indiaby **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Model	Full-colour markable model of durable vinyl
Features shown	Vessels throughout the body, cutaway view of the interior of the heart, enlarged cutaway section of a vein and an artery
Transparency	Colourful three-overlay transparency of the heart
Activity guide	Background information, basic understandings, teacher-developed activities, glossary, key to model structures, colour transparencies and a blackline master

Typical Use

Because the vinyl surface is markable, students can draw the path of blood directly on the model — for example, colouring the route from the body back to the heart, through the lungs and out again — and then compare their tracing with the key to model structures. The three-overlay heart transparency builds the heart up layer by layer on a projector, which helps a whole class follow the chambers and valves before pairs of students work with the cutaway heart on the model itself. Comparing the enlarged vein and artery sections leads naturally into a discussion of wall thickness, blood pressure and valves in veins.

The guide's teacher-developed activities, glossary and blackline master save preparation time, making the set one of the more practical biology teaching aids India schools can use for a complete lesson sequence. Use the key to model structures for quick assessment, store transparencies flat in a folder, and ask us which markers are recommended for the vinyl surface.

Manufacturer

Jain Scientific Equipments Private Limited, which operates under the ScienceLab brand in Ambala, Haryana, supplies this activity set to schools and colleges. The company is incorporated as a private limited company (CIN U29309HR2020PTC087597) and manufactures at its licensed factory at 449, HSIIDC Industrial Area, Saha, Ambala (Factory Licence AMB-ONLINE-CHD-J-414). Our company profile has further details.
