Product Name :

Dental Scaler

Product Code :

SLE/BL/21

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Dental Scaler (Product Code: SLE/BL/21) is a stainless steel hand instrument used to remove calculus (tartar) and other deposits from tooth surfaces during dental treatment in clinics and hospitals. Dentists, hygienists and dental students use it for scaling, and the listing describes it as meeting the diverse needs of dental treatments and surgery. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a supplier of scientific & laboratory instruments for clinics and dental colleges.

Key Details

Parameter	Detail
Material	Stainless steel
Instrument type	Hand dental scaler
Application	Dental treatments and surgery
Product code	SLE/BL/21
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Dental Scaler Used For?

Scaling removes hardened calculus, plaque and stain from the enamel above the gum line. A hand scaler has a narrow working end that reaches into the spaces between teeth; the clinician places the edge just beyond the deposit and draws it away in short, controlled strokes, working around each tooth in turn.

Inspect the working end before each session and set aside any instrument with a bent or damaged tip. Clean and sterilise reusable instruments according to your facility's protocol. Dental teaching departments often buy scalers with mirrors so every trainee has a basic examination and scaling pair; as a lab equipment exporter, ScienceLab can quote both on one order.

What to Specify When Ordering

- How many scalers you need
- Preferred tip pattern or working-end design, as this page does not specify one
- Whether matching dental mirrors or other dental instruments are needed
- Delivery city or port

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the Dental Scaler from Ambala, Haryana. We source dental hand instruments for clinics, hospitals, dental colleges, distributors and importers, and state the pattern offered in each quotation.
