Description :

Bowl Stainless Steel (Product Code: SLE/MU/09) is a round 600 ml stainless steel bowl used to hold swabs, cotton, water and cleaning solutions during dressings and minor procedures in hospitals and clinics. Nursing teams choose it for its austenitic stainless steel body with a smooth surface, an inner diameter of 115-135 mm and a working capacity of 550-650 ml. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Shape	Round bowl, smooth surface
Nominal capacity	600 ml
Capacity range	550-650 ml
Inner diameter	115-135 mm
Height	50-70 mm
Wall thickness	0.75-0.85 mm
Material	Austenitic stainless steel: 18 to 20% chromium, 8 to 10% nickel
Product code	SLE/MU/09
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Stainless Steel Bowl Used For?

A small steel bowl is one of the most handled items on any dressing trolley or procedure tray. Staff use it to hold cotton balls and gauze swabs, to carry water or a cleaning solution to the bedside, or to receive small instruments after use. The 600 ml size, with an inner diameter of around 115-135 mm, is large enough for these jobs yet small enough to sit on a tray alongside instruments.

Austenitic stainless steel with 18 to 20% chromium and 8 to 10% nickel resists everyday corrosion and tolerates repeated washing, and the smooth surface is easy to wipe clean. Clean and reprocess the bowl according to your facility's routine after each use, and, as a general rule for steel ware, keep chlorine solutions in plastic containers rather than in the bowl.

Supplier

Jain Scientific Equipments Private Limited supplies this bowl as part of the ScienceLab medical utensils range from Ambala, Haryana. Hospitals, clinics, nursing schools, dealers and importers in India and international markets can order it with matching trays and basins. Learn about the company on the ScienceLab profile page.
