Product Name :

Kidney Basin Polypropylene

Product Code :

SLE/MU/12

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Kidney Basin Polypropylene (Product Code: SLE/MU/12) is a lightweight plastic kidney dish used to receive used swabs, hold small items and catch fluids at the bedside in general hospital wards. Ward nurses and nursing-school trainers pick it for its autoclavable polypropylene body and compact 475 ml size, which is easy to carry in one hand. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a lab plastic ware supplier in India that also offers the matching bowls and jugs.

Specifications

Parameter	Detail
Item	Basin, kidney shaped
Material	Polypropylene, autoclavable
Capacity	Approx. 475 ml
Length	Approx. 205 mm
Width	Approx. 95 mm
Height	Approx. 45 mm
Intended use	General ward use
Product code	SLE/MU/12
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Plastic Kidney Basin Used For?

On a general ward the plastic kidney basin is the everyday receiver: it sits beside the bed for a patient who feels nauseous, collects cotton and gauze during a quick wound check, and carries a thermometer, tablets or a syringe on a round. Because polypropylene is light and does not clatter, it is comfortable for patients to hold against the chin or cheek and quiet to handle on night rounds.

The approx. 475 ml capacity suits single-patient tasks rather than long procedures. Rinse the basin after each use and, since the listed material is autoclavable polypropylene, it can go through your ward's usual autoclave cycle; keep it away from direct flame or hot plates, which can distort plastic. Training institutes often buy several so each practical group has its own set.

Supplier

Jain Scientific Equipments Private Limited operates under the trading name ScienceLab and supplies this polypropylene kidney basin from its base in Ambala, Haryana. Ward-level buyers, nursing colleges and medical-supply distributors in India and international markets order it together with other plastic and steel utensils so that one consignment covers a whole ward. Company background is on the ScienceLab profile page.
