Product Name :

Disposable Endotracheal Tube With Cuff
Sterile

Product Code :

SLE/RAE/05

Email : sales@scilabexport.com

Phone: +91-7082934803

Description :

Specifications:

Material: Polyvinyl chloride (PVC).

Disposable.

Endotracheal tube shall meet the standards concerning the dimension, the tube, the point, the cuff and the marking.

Endotracheal tube with:

Open distal end and Magill-type point with oral angle of 37.5°.

Cuff located near the distal end: Low pressure cuff, inflating system with valve and Luer tip connector.

Radio opaque mark.

Initial sterilisation method: Ethylene oxide gas or Gamma radiation.

Standard connector (ext. Ø 15mm) at the proximal end enabling the tube to be connected to the ventilation system.

With Murphy's eye.

Sterile.

Graduations.

Size: Ø internal 8mm.

Instructions for use:

Device designed to be introduced into the trachea via the mouth or nose in order to link the trachea (upper respiratory tract) to the outside air, giving the possibility to provide ventilation assistance to patient (manual or mechanical).

Sterile Endotracheal tube:

Device used to correct a deficiency in respiratory function during general anaesthesia or resuscitation.

Intended for endotracheal tubes for adults or children depending the diameter.

Lubricate the distal end and cuff of the endotracheal tube (ETT) and the distal 1/2 of the Endotracheal Tube Introducer (Bougie)

Inserting the endotracheal tube must be done only by staff trained in resuscitation practice.
