Description :

Martin Uterine Sound (Product Code: SLE/SI/04) is a malleable, centimetre-graduated probe used to measure the depth of the uterine cavity through the vagina in gynaecological procedures. It is about 32 cm long, with a silver-coated copper shaft ending in a bulbous tip and mounted on a brass handle. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala,India, a laboratory instruments supplier in India.

Specifications

Parameter	Detail
Material	Silver-coated copper with brass handle
Shaft	Malleable metal, graduated in cm
Tip	Bulbous distal end
Length	Approx. 32 cm
Type	Uterine sound, malleable, Martin pattern, mounted on a handle
Intended use	Measuring, via the vagina, the depth of the uterine cavity
Product code	SLE/SI/04
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Uterine Sound Used For?

Before instruments such as dilators or curettes are introduced, the clinician passes the sound gently through the cervix to find the depth and direction of the uterine cavity. The centimetre graduations give the depth reading, and the blunt, bulbous tip is designed to follow the cavity rather than cut.

The malleable shaft can be given a gentle curve to follow the axis of the uterus; hold the handle lightly and never force the instrument. Clean the silver-coated surface with non-abrasive methods to protect the coating, and reprocess according to your facility's protocol. Medical colleges that order from lab equipment exporters also use the sound in gynaecology instrument teaching.

What to Specify When Ordering

- Number of sounds required
- Whether an approx. 32 cm instrument fits your procedure sets
- Companion instruments such as dilators, uterine forceps or curettes

Supplier

ScienceLab – the trading name of Jain Scientific Equipments Private Limited – supplies the Martin uterine sound from Ambala, Haryana. We source it for hospitals, maternity services, medical colleges, distributors and importers, and can list it on one quotation with dilators, uterine forceps and curettes.
