Description :

Mayo Scissors Curved Blunt/Blunt (Product Code: SLE/SI/09) is a pair of 23 cm operating scissors used to cut threads and dressings and for general cutting work in operating theatres and surgical wards. Theatre nurses and surgeons pick this pattern because both blade tips are rounded, so it cuts by shearing without a point that could catch drapes or tissue. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its range of scientific & laboratory instruments.

Specifications

Parameter	Detail
Material	Martensitic steel (quenched, magnetic)
Composition	0.40% carbon; 14% chromium
Blades	Curved, with blunt ends (blunt/blunt)
Cutting action	Shearing; operating and dissecting scissors
Length	23 cm
Intended use	Cutting threads and dressings; general use
Product code	SLE/SI/09
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Mayo Scissors Used For?

Mayo scissors are the all-round cutters of the instrument tray. The curved 23 cm version is typically picked up to trim suture ends once a knot is tied, to cut dressing material to size and to take on routine cutting where finer dissecting scissors would be blunted. The curve lets the user keep the tips in view while cutting close to a surface.

Medical and nursing colleges place a pair at suturing and dressing practice stations so students learn to cut threads to a sensible length. Keep one pair for materials and another for tissue, wipe the blades after each use and check that the joint closes smoothly before the scissors go back on the tray. Buyers comparing a laboratory equipment supplier in India for mixed hospital and teaching orders can list these scissors with the forceps and needle holders they need.

Supplier

Jain Scientific Equipments Private Limited, which trades as ScienceLab, sources and supplies Mayo operating scissors from Ambala, Haryana, to hospitals, nursing schools, medical colleges and distributors in India and international markets. Scissors are usually ordered together with forceps, needle holders and trays, and one quotation can cover the whole list.
