Description :

Hegar Uterine Dilator Double Ended (Product Code: SLE/SI/34) is a set of graduated cervical dilators used to dilate the cervix so that instruments for evacuating the uterus can be inserted. Gynaecology and obstetric units receive it as a set of 8 double-ended instruments (16 dilators) from 3–4 mm to 17–18 mm diameter in a canvas roll, with rounded, smooth, non-traumatic ends.It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for hospitals and for laboratory equipment tenders in India.

Specifications

Parameter	Detail
Type	Cervical dilator, double ended
Set	8 double-ended instruments (16 dilators) in a canvas roll
Diameter range	3–4 mm to 17–18 mm
Ends	Rounded, smooth and non-traumatic
Material	Austenitic steel (non-quenched, non-magnetic)
Composition	16–18% chromium; 10–14% nickel; 2–3% molybdenum
Intended use	Dilating the cervix of the uterus to make room for the insertion of instruments used in evacuation of the uterus
Product code	SLE/SI/34
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Hegar Dilator Used For?

Before the uterus can be evacuated, the cervical canal has to be opened wide enough for a curette or scoop to pass. The clinician inserts the dilators one after another, starting with the smallest diameter and stepping up gradually until the canal accepts the instrument that will be used. The rounded, smooth ends are made to be non-traumatic.

Because each instrument carries a dilator at both ends, the set of 8 covers 16 diameters while taking up little space in its canvas roll, and the austenitic steel is non-magnetic. Gynaecology departments can order the dilator set together with a uterine sound, cervical forceps and curettes. Check the roll after each use so that every size is returned to its place.

What to Specify When Ordering

- Number of complete sets (each set is 8 double-ended instruments, 16 dilators, in a canvas roll)
- Confirmation that the 3–4 mm to 17–18 mm diameter range suits your procedures
- Companion instruments for the procedure, such as a uterine sound, uterine forceps or curettes
- Delivery destination and any documents your purchasing team requires
