Description :

Adult Wheelchair (Product Code: SLE/HE/11) is a basic foldable wheelchair used to move adult patients around hospitals, clinics and care homes, for example between wards, theatres and diagnostic rooms. It has a corrosion-resistant tubular steel frame, fully upholstered seating, swing-away foot and arm supports and brakes on both rear wheels, suited to tropical conditions. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Type	Basic foldable wheelchair for adults
Frame	Chrome-plated or epoxy-coated tubular steel; high resistance to corrosion (tropical environment)
Seating	All seating parts upholstered: armrests, seat and back
Upholstery cover	Flexible plastic, highly tear resistant, anti-static, flame retardant, disinfectant- and liquid-proof, washable
Wheels	Heavy carriage on 4 ball-bearing wheels; front wheels free rolling with 360-degree swivel
Tyres	Heavy-duty solid rubber
Brakes	On both rear wheels
Foot and arm supports	Swing-away, for easy stepping on and off; side-to-side leg support
Tilting	Foot lever integrated in the frame for tilting the wheelchair backwards
Push handles	Two at the rear, fitted with plastic rims
Product code	SLE/HE/11
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is an Adult Wheelchair Used For?

In a hospital, a basic wheelchair is the everyday way to take a patient who can sit but should not walk from admission to the ward, to X-ray, to theatre or to the discharge point. An attendant pushes it by the two rear handles, the swivelling front wheels make tight corners easier, and the rear brakes hold it still while the patient gets in or out. Swinging the foot and arm supports aside clears the way for a safe transfer.

The foot lever on the frame lets the attendant tilt the chair backwards to lift the front wheels over a kerb or threshold. Solid rubber tyres cannot puncture, and the frame is finished to resist corrosion in humid, tropical conditions. The upholstery is liquid-proof and can be washed and disinfected between patients, and the frame folds so spare chairs can be stored compactly.
