Shelf life	Depends on the batch and storage conditions; ask us for the expiry date of the batch you are quoted
Product code	SLE/SAH/10
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Laundry Washing Powder Used For?

Clean clothing, bedding and cloth items are part of basic hygiene, especially where families live in crowded shelters or have limited water. This concentrated powder is intended for washing by hand in a bucket or basin, which is how most laundry is done in relief camps, rural homes and many hostels. A concentrated powder means a smaller amount is needed per wash, which helps a single 1.5 kg pack last longer.

The water-resistant pack protects the powder from rain and humidity during transport and storage, so it does not cake before it reaches users. Dissolve the powder fully in water before adding clothes, rinse well and keep the pack closed and off the ground between uses. Wear gloves if you have sensitive skin or wash for long periods.

What to Specify When Ordering

- Number of 1.5 kg packs.
- Preferred water-resistant packaging type, if your programme requires one: plastic bag, carton with plastic insert or laminated carton.
- Whether soap bars or other hygiene items should be quoted for the same distribution.
