Weft	Minimum 18.5 threads per cm
Colour	Natural, light brown or grey
Product code	SLE/SAH/22
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Multipurpose Cotton Cloth Used For?

As its name says, this cloth has many uses. In household and hygiene kits it serves as a towel, a wrap or cover, a sheet for a child, or a cleaning cloth, and it can be cut into smaller pieces for washing, wiping or personal hygiene. Cotton is absorbent, comfortable against the skin and easy to wash by hand, which is why it is favoured for distributions where people have limited access to other textiles.

The fabric figures tell a buyer how substantial the cloth is: 170–180 g/m² is a medium-weight fabric, and the minimum thread counts in the warp (lengthwise) and weft (crosswise) describe how densely it is woven. The natural, light brown and grey colour options also help hide everyday staining. Washing the cloth before first use is advisable.

What to Specify When Ordering

- Quantity of cloths, for example per household or per kit.
- Preferred colour — natural, light brown or grey.
- Other kit items, such as soap or washing powder, to be quoted in the same order.

Supplier

Jain Scientific Equipments Private Limited, known as ScienceLab, supplies this cotton cloth from Ambala, Haryana, as part of its water, sanitation and hygiene range. Relief programmes, schools, institu and other
