Description :

Microslide Harmful Bacteria (Product Code: SLE/PS/91) is a Microslide of 8 related 35mm images, photographed through a microscope, used to show bacteria that cause disease in people and crops in school biology and health education lessons. The listed subjects include the bacteria of diphtheria, typhoid fever, pneumonia, tuberculosis and food poisoning at 2000x, together with potato ring-rot and apple fire-blight bacteria. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Format	Microslide – 8 related 35mm images photographed through a microscope
Viewing	Microslide Viewer
Human disease subjects	Diphtheria (2000x), typhoid fever bacteria (2000x), pneumonia bacteria (2000x), bacteria of tuberculosis (2000x), bacteria of food poisoning (2000x)
Plant disease subjects	Bacteria of potato ring-rot; bacteria of apple fire-blight (2000x)
Labelling	Arrows and callouts show the features to look for
Folder	Detailed text folder with questions; pocket holds the Microslide
Product code	SLE/PS/91
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Microslide Harmful Bacteria Used For?

Typhoid, tuberculosis and food poisoning appear in most school health syllabuses, but the bacteria behind them should never be grown in a school lab. This Microslide lets students see those organisms as photographed images, with arrows and callouts pointing out their shape and arrangement, without anyone handling a culture.

Potato ring-rot and apple fire-blight widen the discussion to farming, showing that bacteria also damage crops and food supplies. Used with the text folder questions, the set supports lessons on hygiene, clean water and safe food handling, and it fits well into a health education kit for schools alongside Microslide Helpful Bacteria.

Manufacturer

Jain Scientific Equipments Private Limited manufactures Microslide Harmful Bacteria through its ScienceLab brand, working in Ambala, Haryana. Schools and colleges usually request it together with the viewer and the other microbe and disease titles, and the company arranges supply for institutions and dealers in India and international markets. The ScienceLab profile has more about the company.
