Settings	Ice-breaker in one-to-one situations or discussion tool for the entire class
Product code	SLE/BL/053
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Substance Abuse Discussion Cube Used For?

Talking about substance use is difficult for many students, and a cube gives the conversation a neutral starting point. The student who rolls it responds to the theme that comes up — for example how a habit might change friendships, affect schoolwork, or harm health — and others add their views. Because the topic is chosen by the roll rather than by the teacher, students often open up more readily than in a question-and-answer session.

School counsellors use the same cube one-to-one to ease into a sensitive conversation. Set ground rules first: no one has to share personal experiences, and everyone listens respectfully. Close the session by telling students where they can go for help. The cube fits naturally into a health education kit for secondary classes in India and pairs well with anatomy resources that show what tobacco and alcohol do inside the body.

Manufacturer

This cube is manufactured by **Jain Scientific Equipments Private Limited**, which does business as **ScienceLab** in Ambala, Haryana, India, and provides teaching resources to institutions in India and international markets. Schools can order it alongside anatomy models and posters for the same health unit. More about the company is on its profile page.
