Product Name :

Foetus Model, Four Month

Product Code :

SLE/A/156

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

The **Foetus Model, Four Month** (Product Code: SLE/A/156) presents a 16 week foetus within a model of the womb, with realistic life-sized models of the embryo/foetus at 6, 8, 10, 12 and 14 weeks arranged in sequence beside it. Seeing the stages together at true size helps students grasp how much the developing baby grows during the first four months of pregnancy. Manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, it is suited to school biology lab equipment collections in India as well as nursing, midwifery and health education classrooms.

Specifications

Parameter	Detail
Main model	16 week foetus within a model of the womb
Earlier stages	Embryo/foetus at 6, 8, 10, 12 and 14 weeks
Scale	Realistic, life-sized
Arrangement	Earlier stages sequenced next to the 16 week foetus
Illustrates	Size, physical features and positioning of the embryo/foetus

Typical Use

Teachers use the sequence to show the transition from embryo to foetus: learners compare the 6 week stage with the 14 and 16 week stages and describe what changes in body proportions, limbs and facial features. The womb model adds a second lesson on positioning, allowing a discussion of how the foetus lies inside the uterus and how the available space changes as development continues.

Since every stage is life-sized, the model is also effective in health education and antenatal awareness sessions, where real dimensions carry more meaning than enlarged diagrams. Keep it on a stable bench at eye level and let small groups examine it in turn; it then works as hands-on biology lab equipment for reproduction topics rather than a cupboard display.

Manufacturer

This model comes from Jain Scientific Equipments Private Limited, the Ambala, Haryana company known by its trading name ScienceLab, which manufactures teaching models and laboratory equipment for educational institutions. Our company profile gives further background.

Related Human Models

Useful companions for a complete lesson on pregnancy and development:

- Period of Gestation Model — a set of stand-mounted stages that extends the developmental timeline
- Human Embryo Development Set — additional models of early development
