Product Name :

Human Foetus Model

Product Code :

SLE/A/160

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

The **Human Foetus Model** (Product Code: SLE/A/160) is a three-part model that shows the relationship between the foetus, the foetus membrane and the uterus. Rather than tracing growth over time, it concentrates on how the developing baby is enclosed and supported inside the mother, which makes it valuable for reproduction, pregnancy and nursing lessons. It is produced by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an anatomical models manufacturer in Ambala, India.

Specifications

Parameter	Detail
Construction	Three-part model
Structures shown	Foetus, foetus membrane and uterus
Teaching focus	Relationship between the foetus, its membrane and the uterus

Typical Use

Teachers use the model to explain, from the outside in, how the muscular uterus holds the pregnancy, how the membrane encloses the foetus and cushions it within a fluid-filled space, and how the foetus lies inside this protected environment. Students can then discuss why the membrane matters, what happens when it ruptures at the start of labour, and how the arrangement changes as the pregnancy advances.

In nursing, midwifery and health education courses, the model helps trainees picture what they will later palpate or see on an ultrasound image, and it works well with other biology teaching aids for pregnancy topics, such as placenta and developmental-stage models.

Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited (CIN U29309HR2020PTC087597), an Ambala, Haryana company that manufactures at its licensed factory at 449, HSIIDC Industrial Area, Saha, Ambala (Factory Licence AMB-ONLINE-CHD-J-414). See the company profile for details of the business.

Related Human Models

Models that build a fuller picture of pregnancy alongside this one:

- Human Placenta Model — explains the exchange between mother and foetus
- Foetus Model, Four Month — life-sized developmental stages shown within a womb model
- Period of Gestation Model — stand-mounted stages of embryonic and foetal development
- Human Birth Demonstration Model — continues the lesson to the process of birth
