Product Name :

Male Pelvis Section Model

Product Code :

SLE/A/165

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

The **Male Pelvis Section Model** (Product Code: SLE/A/165) is a natural size sectional model on a base that shows the rectum, the bladder with the prostate, the testicular ducts and the external genital organs. A numbered key card is supplied so each structure can be identified quickly. Manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, it serves colleges, nursing schools and senior biology classes that source anatomy models from a biology lab equipment supplier in India.

Specifications

Parameter	Detail
Scale	Natural size
Mounting	On base
Structures shown	Rectum; bladder with prostate; testicular ducts; external genital organs
Identification	Numbered key card

Typical Use

Because the model is natural size, students gain a realistic sense of how closely the bladder, prostate and rectum lie to one another — knowledge that matters in nursing and paramedical training for procedures such as urinary catheterisation. Teachers can trace the route sperm take from the testicular ducts past the prostate to the exterior, and explain why enlargement of the prostate can affect the flow of urine from the bladder.

Set it beside a female pelvic section to compare the two pelvic layouts in one lesson, and use the numbered key card for a timed identification exercise at the end. Used this way, it is a practical piece of school biology lab equipment for senior classes as well as a reference model for professional courses.

Manufacturer

ScienceLab is the brand of Jain Scientific Equipments Private Limited, a manufacturer of anatomy models and science laboratory equipment located in Ambala, Haryana, India. Our company profile explains more about the company and its range.

Related Human Models

Models that round out male pelvic and reproductive anatomy lessons:

- Human Male Reproductive System Model Set — a broader set covering the male reproductive organs
- Male Skeletal Pelvis — the bony framework that surrounds these organs
- Human Male and Female Urogenital Systems Model — compares male and female urogenital anatomy
- Female Pelvis Model — the female median-section counterpart
