Description :

The **Period of Gestation Model** (Product Code: SLE/A/166) is a set of nine models, each mounted on its own stand, showing various stages of embryonic and foetal development. Arranged in order, the nine stands turn prenatal development into a timeline that students can walk along and compare stage by stage. The set is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, and is used as biology lab equipment in India for reproduction and human development topics.

Specifications

Parameter	Detail
Number of models	Nine
Mounting	Each model mounted on its own stand
Coverage	Various stages of embryonic and foetal development

Typical Use

Lined up along a bench, the nine models let a class follow development from the embryonicperiod into the foetal period, noting how the body takes shape, how limbs and features form andhow overall size increases. Because every stage has its own stand, individual models can behanded to small groups for close study and then returned to their place in the sequence.

A simple assessment is to mix up the stands and ask students to put them back in the correct order, explaining the clues they used. The set also supports health education sessions on prenatal care, where seeing each stage helps learners understand why the early weeks of pregnancy are so important. It sits well with other biology teaching aids on reproduction, such as placenta and pelvis models.

Manufacturer

This gestation set is manufactured in Ambala, Haryana, by Jain Scientific Equipments Private Limited, which trades under the ScienceLab name and supplies teaching models and laboratory equipment to institutions. The company profile provides more background.

Related Human Models

Models that fill in the rest of the story around the gestation sequence:

- Human Embryo Development Set — additional models focused on early development
- Human Embryo Set, PVC — an alternative embryo set in PVC
- Foetus Model, Four Month — shows a foetus positioned within a womb model
- Human Birth Demonstration Model — the final stage, birth

Our complete Human Models range includes more reproduction and anatomy models.
