Description :

Sight & Sound Health Lab (Product Code: SLE/BL/056) is a senses investigation kit used to explore the structure and function of sight and hearing in school biology and health lessons, and belongs to our range of biology lab equipment in India. Students work with a vision disk, pinhole viewer, lenses, eye chart, masks, flashlight and rubber balls, guided by an extensive pack of activities and a Teacher's Guide. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as a science kit for students in India and overseas.

Specifications

Parameter	Detail
Type	Senses investigation kit (sight and sound)
Kit contents	Vision disk, pinhole viewer, lenses, eye chart, masks, flashlight, rubber balls, extensive pack of activities, Teacher's Guide
Topics	How a lens affects vision, measuring field of vision, capturing sound waves
Suitable for	School biology and health lessons on the eye and ear
Product code	SLE/BL/056
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Sight & Sound Health Lab Used For?

Working through the activity pack, students look through the lenses to see how each one changes what they see, which leads into how the lens of the eye focuses light and why some people need glasses. The vision disk is used to measure field of vision, and the eye chart gives partners a simple way to check how clearly each of them can read at a distance. The pinhole viewer shows how an image forms when light passes through a small opening.

For the hearing half of the lab, students explore how the ear captures sound waves and how the shape of the outer ear helps collect them. The Teacher's Guide sets out each investigation so the kit can run as a single lesson or over several sessions. Many teachers show an eye model alongside these activities, while the hearing tasks double as a simple sound wave experiment kit for school science classes in India. Wipe the masks and viewers between users.

Supplier

This kit is supplied by **Jain Scientific Equipments Private Limited**, operating as **ScienceLab** in Ambala, Haryana, India, with customers in India and international markets. Schools can add eye and ear models, or companion health labs, to the same quotation. Find out more on the company profile.
