Product Name :

Fixed Angle Rotor

Product Code :

SLE/LC/14

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Fixed Angle Rotor (Product Code: SLE/LC/14) is a centrifuge rotor accessory, designated 30-15, used to spin 30 tubes of 15 mL at once in a compatible laboratory centrifuge. It suits clinical, teaching and research laboratories that process large batches, and buyers adding capacity to a laboratory centrifuge in India should confirm fit with us before ordering. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Fixed angle centrifuge rotor
Designation	30-15
Capacity	15 mL x 30
Supplied as	Centrifuge rotor (accessory)
Compatibility	To be confirmed against your centrifuge make and model
Product code	SLE/LC/14
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Fixed Angle Rotor Used For?

The Fixed Angle Rotor is used to pellet cells, precipitates and debris from a large batch of 15 mL tubes in one run. Every tube sits at the same constant angle to the spin axis, so particles travel only a short distance before reaching the outer wall of the tube and then slide down to form a compact pellet. A 30-place layout is handy when an entire class set or a full morning of samples needs to be spun together.

Fill tubes to matching volumes and place them in diametrically opposite positions; if you are not using every position, keep the load symmetrical around the rotor. Never run the rotor above the lower of the rotor's and the centrifuge's rated limits, so ask us for the rating before first use. After each session, rinse off any spills, dry the cavities fully and inspect them for corrosion or cracks.

What to Specify When Ordering

- The make and model of the centrifuge the rotor will be fitted to
- Number of rotors required
- Whether 15 mL tubes should be quoted with the rotor

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala, Haryana, supplies the Fixed Angle Rotor to laboratories, service teams and dealers in India and international markets. Because rotor fit depends on the centrifuge, the company checks your machine's make and model before it quotes. See our company profile to learn more about the comp
