Description :

Autoclave Tape (Product Code: SLE/CH/188) is a self-adhesive sterilisation indicator tape made of semicreped paper, used to seal and mark items before they go into an autoclave so that processed and unprocessed loads can be told apart at a glance. Each reel is 50 m long and 25 mm wide, the tape stays affixed for 18 months, and it sticks to plastic, metal, fabric, paper and cardboard. It is a small but constant item of microbiology lab equipment in teaching, clinical and research laboratories, supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Self-adhesive sterilisation indicator tape
Material	Semicreped paper
Reel size	50 m x 25 mm
Adhesion life	Remains affixed for 18 months
Suitable surfaces	Plastic, metal, fabrics, paper, cardboard

Typical Use

Technicians tear off a strip to close a wrapped instrument pack, to hold foil over the mouth of a flask of culture medium, or to mark a filled waste bag before loading the autoclave. After the cycle, the indicator markings show which items have been exposed to the sterilisation process, so nobody mistakes a fresh bundle of media bottles for one still waiting to be processed. Because the tape grips cloth wraps, glass, metal trays and cardboard alike, a single reel covers most of the jobs in a prep room, and labs usually order it together with their other lab consumables.

Apply the tape to a clean, dry surface and press it down firmly along its length. The semicreped paper stretches slightly, which helps it follow the curve of a bottle neck or the fold of a wrap. Keep spare reels in a cool, dry cupboard away from steam lines.

Supplier

Autoclave Tape is supplied by Jain Scientific Equipments Private Limited, an Ambala, Haryana company whose trading name is ScienceLab and which equips school, college and research laboratories with apparatus and day-to-day supplies. Read more on the [about the company](#) page.

Related Chemistry Lab Equipment

Items the tape is most often used with:

- [Autoclave Bag Disposable](#) — 400 x 600 mm waste bags that are marked with tape before a cycle.
- [Autoclave Bag](#) — the larger 610 x 810 mm waste bag.
- [Autoclave Basket](#) — for loading taped items into the chamber.
- [Portable Autoclave Single Drum](#) — a compact autoclave for school and college labs.
