Description :

Human Brain Model in Head (Product Code: SLE/BL/42) is a colored anatomical head model used to teach the position of the brain, the important parts of the skull and the cranial nerves in biology, nursing and paramedical classrooms. The head with brain divides into three parts andthe brain itself into 2 parts, all numbered, on a base with a key card. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of anatomical models, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Head model with brain
Divisions	Head with brain divided into three parts; brain divided into 2 parts
Structures shown	Brain, important parts of the skull, cranial nerves and related features
Finish	Appropriately colored and numbered
Identification	Key card
Mounting	On a base
Product code	SLE/BL/42
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Human Brain Model in Head Used For?

Because the brain sits inside the head rather than on its own, this model answers a question students often ask about a loose brain model: how is the brain protected, and where do the nerves leave it? Teachers open the head to reveal the brain, then trace the cranial nerves from the brain towards the skull, supporting lessons on the nervous system, control and coordination, and the protective role of the skull. Nursing and allied health students also use it to relate the brain to the landmarks of the head.

A practical routine is to let small groups take the model apart and reassemble it while naming each numbered structure from the key card, then test one another with the key covered. Handle the parts over a table and store the model on its base when not in use. It sits naturally in a human biology model set alongside skull and nervous system models.

OEM Manufacturer

The Human Brain Model in Head is an own-make product of Jain Scientific Equipments Private Limited, which trades as ScienceLab. As the OEM (original equipment manufacturer), the company makes it at its own licensed factory at Saha, Ambala, Haryana, India, and supplies schools, colleges, institutions, dealers and importers straight from the factory.
