Description :

Human Brain Model with Arteries (Product Code: SLE/BL/45) is a natural-size PVC anatomical model used to teach the external features of the brain together with its arterial supply in college, nursing and medical classrooms. Measuring 18.5 x 14 x 13.5 cm, it is dissectible into 8 parts and stands on a base, so the relations between component portions can be shown as one system. Itis made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of anatomical models, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Scale	Natural size
Size	18.5 x 14 x 13.5 cm
Material	PVC plastic
Dissection	Dissectible into 8 parts
Arterial supply shown	Sources of supply; vertebral and internal carotid arteries; arterial supply of the cerebellum and cerebrum
External features shown	Cerebral hemisphere, brain stem, cerebellum
Mounting	On base
Product code	SLE/BL/45
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Brain Model with Arteries Used For?

This model is chosen when a course needs to explain where the brain gets its blood and what happens when that supply fails. Starting at the sources, the lecturer traces the vertebral and internal carotid arteries upward to the base of the brain and then follows the branches that serve the cerebrum and cerebellum. Students can then connect a blocked vessel to the region of brain it supplies — a foundation for understanding stroke in nursing, physiotherapy and medical teaching. As a 3D model it communicates these spatial relationships far better than a flat diagram.

Taking the eight parts apart lets students see how the cerebral hemisphere, brain stem and cerebellum fit together and how the arteries run between them. The PVC construction is practical for repeated classroom handling; reassemble the parts after use and wipe the surfaces clean before returning the model to its base.

OEM Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, the OEM (original equipment manufacturer) that makes the Human Brain Model with Arteries at its own licensed factor
