Description :

Retort Clamp, Rubber Jaws (Product Code: SLE/LC/18) is a laboratory clamp with rubber-lined diecast jaws, used to hold flasks, bottles and tubes up to 90 mm across on a retort stand. It is mounted on a 135 mm rod of 8 mm diameter, measures 250 mm overall, and its clamping rod works through swivels set into the jaws so they settle evenly on the item. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Jaws	Diecast, rubber-lined
Jaw capacity	90 mm
Clamping mechanism	Clamping rod operates through swivels mounted in the jaws
Mounting rod	135 mm long, 8 mm diameter
Overall length	250 mm
Product code	SLE/LC/18
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Rubber Jaw Retort Clamp Used For?

A 90 mm jaw capacity covers a wide range of everyday glassware on a student bench, including conical flasks, reagent bottles, measuring cylinders and boiling tubes. The swivels in the jaws let each jaw pivot slightly as the clamping rod is tightened, so the rubber pads sit flat against curved or tapered surfaces instead of pinching at one point.

Before setting up, check that your boss or clamp holder grips an 8 mm rod securely; the 135 mm rod length decides how far the vessel sits from the stand upright. The rubber lining grips smooth glass well but should be kept away from flames, hot plates and prolonged solvent contact. Used this way, it is a common piece of chemistry lab equipment on school and college benches.

OEM Manufacturer

Jain Scientific Equipments Private Limited, whose brand is ScienceLab, is the OEM of the Retort Clamp, Rubber Jaws and produces it at its own licensed factory at Saha, Ambala, Haryana, India. That factory ships directly to teaching labs, research institutes, lab-supply dealers and importers in India and international markets, so pricing, repeat orders and spares are all handled by the maker. Ask us if you need clamps to match ones supplied earlier. Company details are on the ScienceLab profile.
