Description :

Retort Metalware Kit (Product Code: SLE/LR/19) is a class set of retort stand metalware used to equip student work stations for basic chemistry experiments in schools and colleges. It contains five heavy-duty 200 × 125 mm retort bases, five 600 mm steel retort rods, five die cast retort clamps and five PVC coated retort clamps, so the set divides evenly into five stations, each with a base, a rod and two clamps. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**,an OEM manufacturer of chemistry lab equipment in India, at its own factory in Ambala, as aready chemistry teaching kit for Indian schools.

Specifications

Parameter	Detail
Type	Class set of retort metalware
Purpose	Essential metalware to start a basic chemistry experiment
Retort bases	5 × heavy duty, 200 × 125 mm
Retort rods	5 × steel, 600 mm long
Die cast retort clamps	5
PVC coated retort clamps	5
Product code	SLE/LR/19
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Retort Metalware Kit Used For?

Most first chemistry practicals need something held above the bench: a funnel over a beaker for filtration, a boiling tube over a burner, a delivery tube feeding a gas jar, or a condenser in a simple distillation. This kit gives a teacher enough bases, rods and clamps to run the same experiment at five stations at once, instead of sharing one stand around the room.

The two clamp types have different jobs. The die cast clamps give a firm, rigid grip for heavier items, while the PVC coated clamps cushion glass so test tubes and flasks are less likely to slip or crack. Set the bases on a flat bench, keep loads above the base, and count the pieces back in after class so every station stays complete.

What to Specify When Ordering

- The number of kits (each kit covers five stations).
- Any extra clamps, bossheads or retort rings needed for particular experiments.
- The delivery location, in India or abroad.
